Profile

Computer Engineering student at ENSA Tétouan (National School of Applied Sciences), specializing in Computer Systems and Decision Support. Passionate about designing intelligent end-to-end solutions, I combine experience in full-stack development (Spring Boot, Laravel, React), AI integration (RAG, Machine Learning, predictive scoring) and DevOps tools (Docker, CI/CD, Kubernetes). In this context, I am seeking a final-year internship (PFE) starting January 2027.

Education

ENSA Tétouan Tétouan, Morocco
Engineering Cycle in Computer Engineering *2024 – Present*

ENSA Tétouan Tétouan, Morocco
Integrated Preparatory Cycle *2022 – 2024*

Experience

Software Development Intern (PFA) July – August 2026
INFRANET ENGINEERING SARL AU *Tétouan, Morocco*

- Designed an open-source solution replacing a paid commercial connector, using PostgreSQL/PostGIS as spatial storage for Autodesk AutoCAD Map 3D Industry Models.
- Developed in Python a translation engine converting Autodesk metadata into PostGIS schemas, along with a real-time synchronization service.
- Set up Docker Compose monitoring (Prometheus, Grafana) and an automated Windows installer.

Web Development Intern July – August 2025
AGILE SQUARE *Casablanca, Morocco*

- Designed and developed a web application for managing activity reports (CRA) using an MVC architecture with Laravel and MySQL.
- Implemented secure authentication via Keycloak (OAuth2) and a role-based access management system.
- Automated data entry, improved activity traceability and optimized data management.

Projects

RAWABET, AI-Powered CRM for Real Estate Agencies May 2026
Spring Boot 3, Spring AI (RAG), NVIDIA NIM, PostgreSQL, pgvector, React

- CRM for real estate agencies: client tracking, lead prioritization and sales follow-up automation.
- AI chatbot and RAG engine (Spring AI, pgvector) analyzing documents and giving each lead a score from 0 to 100 , with n8n automations.
- Two React applications (agency and client) with interactive map, dashboards and role-based access (JWT).

SGITU, Subscription Management Microservice May 2026
Spring Boot 3, Kafka, MySQL, Resilience4j, Docker, GitHub Actions, Kubernetes

- Subscription service for urban transport: enrollment, pause, suspension and prorated refund calculation.
- Event-driven architecture with 13 Kafka event types and automatic failure recovery (Resilience4j).
- Multi-stage Docker containerization and automated deployment through a GitHub Actions CI/CD pipeline.

AURORA, Geomagnetic Storm Prediction April 2026
Python, Scikit-learn, Pandas, NumPy, FastAPI, Streamlit, Docker Compose

- Model predicting geomagnetic storms 6 hours ahead to protect power grids and satellites.
- Pipeline of 43,207 NASA observations over 5 years and a Random Forest optimized for recall: 98.72% (PR-AUC 0.767).
- REST API with FastAPI and Streamlit interface, containerized and orchestrated with Docker Compose.

Technical Skills

Full-Stack Development: Java, JEE, Spring Boot, Laravel, PHP, React, TypeScript, Dart, C#, HTML, CSS, Tailwind
AI Engineering & Data Science: Python, Spring AI, RAG, Machine Learning, Scikit-learn, Pandas, NumPy, FastAPI, Streamlit , n8n
DevOps & Containerization: Git, GitHub Actions, CI/CD, Docker, Kubernetes
Data & Databases: PostgreSQL, pgvector, MySQL, Oracle DB Administration, PL/SQL
Architecture & Security: Microservices, REST API, Kafka, Resilience4j, Keycloak, OAuth2, JWT, RBAC, Linux
Methodologies & Tools: Agile, Scrum, Jira

Languages

Arabic: Native **French:** DELF B2 **English:** B2

Extracurricular Activities

- Member of the InfoTech club (ENSA Tétouan)
- Organizing committee member, Blood Donation event (2023-2024 and 2024-2025)
- Organizing committee member, IT conference (2024-2025)
- Organizing committee member, ENSA Tétouan Corporate Forum (2025-2026)
