Profile

Computer Engineering student at ENSA Tétouan, specializing in Information Systems and Decision Support. Passionate about designing end-to-end intelligent solutions, I combine experience in software development (Spring Boot, Laravel, React), AI integration (RAG, Machine Learning, predictive scoring) and DevOps tools (Docker, CI/CD, Kubernetes). In this context, I am seeking a final-year internship (PFE) in software development starting January 2027.

Education

ENSA Tétouan Tétouan, Morocco
Engineering Degree in Computer Engineering (specialization: Information Systems and Decision Support) *2024 – Present*

ENSA Tétouan Tétouan, Morocco
Integrated Preparatory Cycle *2022 – 2024*

Experience

Software Development Intern (PFA) July – August 2026
INFRANET ENGINEERING SARL AU *Tétouan, Morocco*

- Designed an open-source solution replacing a paid commercial connector, enabling PostgreSQL/PostGIS to be used as the spatial storage for Autodesk AutoCAD Map 3D Business Models.
- Developed in Python a translation engine converting Autodesk metadata into PostGIS schemas, and a real-time synchronization service.
- Set up Docker Compose monitoring (Prometheus, Grafana) and an automated Windows installer.

Web Development Intern July – August 2025
AGILE SQUARE *Casablanca, Morocco*

- Designed and developed a web application for managing activity reports (CRA) using an MVC architecture with Laravel and MySQL.
- Implemented secure authentication via Keycloak (OAuth2) and a role and access management system.
- Automated data entry, improved activity traceability and optimized data management.

Projects

RAWABET, AI-powered CRM for real estate agencies May 2026
Spring Boot 3, Spring AI (RAG), NVIDIA NIM, PostgreSQL, pgvector, n8n

- CRM for real estate agencies: client tracking, lead prioritization and automation of commercial follow-up.
- AI chatbot and RAG engine (Spring AI, pgvector) analyzing documents and assigning leads a score from 0 to 100, with n8n automations.
- Two React applications (agency and client) with interactive map, dashboards and role-based access (JWT).

SGITU, Subscription Management Microservice May 2026
Spring Boot 3, Kafka, MySQL, Resilience4j, Docker, GitHub Actions, Kubernetes

- Subscription service for urban transport: subscription, pause, suspension and prorated refund calculation.
- Event-driven architecture with 13 Kafka event types and automatic failure recovery (Resilience4j).
- Multi-stage Docker containerization and automated deployment through a GitHub Actions CI/CD pipeline.

AURORA, Geomagnetic Storm Prediction April 2026
Python, Scikit-learn, Pandas, NumPy, FastAPI, Streamlit, Docker Compose

- Model predicting geomagnetic storms 6 hours ahead to protect power grids and satellites.
- Pipeline of 43,207 NASA observations over 5 years and a Random Forest optimized for recall: 98.72 % (PR-AUC 0.767).
- FastAPI REST API and Streamlit interface, containerized and orchestrated with Docker Compose.

Technical Skills

Full-Stack Development: Java, Spring Boot, Laravel, PHP, React, Dart, C#, HTML, CSS, Tailwind
AI Engineering & Data Science: Python, Spring AI, RAG, Machine Learning, Scikit-learn, Pandas, NumPy, FastAPI, Streamlit, n8n
DevOps & Containerization: Git, GitHub Actions, CI/CD, Docker, Kubernetes
Data & Databases: PostgreSQL, pgvector, MySQL, Oracle DB Administration, PL/SQL
Architecture & Security: Microservices, REST API, Kafka, Resilience4j, Keycloak, OAuth2, JWT, RBAC, Linux
Methodologies & Tools: Agile, Scrum, Jira

Certifications

Introduction to Containers w/ Docker, Kubernetes & OpenShift – *IBM* In progress 2026
Build a CI/CD Pipeline with Docker: From Code to Deployment – *Coursera* September 2026
Learn Python With 20+ Real World Projects – *Udemy* February 2026
